## Dear colleagues!

We invite you to take part in the second international scientific and practical conference **Technological platform “Hard mineral resources”: technological and ecologic problems of natural and man-made mineral resources mining** that will be held within the framework of the V Ural mining forum in Yekaterinburg.

### **The objectives of the conference:**

The analysis and generalization the practice of solving technological and ecologic problems of natural and man-made mineral resources mining, determination the prospect trends of laying and development integrated ecologically oriented geo-technologies of hard mineral resources mining, wastes' treatment; procedures and modes of control the environment preservation and disturbed territories rehabilitation; informational exchange of fundamental and applied scientific researches' results and experimental designs.

### **The subject-matter of the conference provides for holding sessions on the following trends:**

- integrated mineral resources utilization and processing;
- priority technologies of geo-resources mining and utilization that provide for mining and processing production isolation;
- ecologic and technological problems and the ways of their solving while mining mineral resources;
- integrated approach to northern territories mining and rehabilitation;

- geo-information technologies and eco-modeling;
- the regions' geo-economic problems.

### **Rules of participation**

Organizational expenditures are paid by the hosting party. The journey and residing are paid at the expense of the sending party or at the expense of a conference participator.

The eventuality of full-time (report, stand paper, without report) and postal participation is provided for.
